# PROJECT: EXPLORATORY DATA ANALYSIS

Data: cereals\_data

### **Abstract**

This project is designed for Full Time students of Data Science/Analytics for sharpening their skills related to Data Exploration. Students will also learn as how to work as team, showcase their work through Power Point Presentation for attracting stake holders and recruiters.

# Project

# **Topic: Exploratory Data Analysis**

## **Data Sets:**

## (1) cereals\_data [77 rows by 16 columns]

#### Pretext:

**TuSigma** has approached your institute for getting assistance in analyzing data given by their client **Jolly Foods Inc. JF** wants to build their understanding about calories in relation with other nutrients and ratings across different manufacturers. Trusting your capability your institute's administration has given this special task to you. Post your analysis you alongwith **TuSigma** representative will be required to give an impressive presentation to **Jolly Foods Inc** for 10 minutes.

Your mentor has advised you to perform following tasks. He advised you to form a team of 2 members. As Data Science work is a team effort, your mentor wants you to learn good team work at this stage.

#### Tasks:

- 1) Data is having missing values. Develop an appropriate approach for addressing missing values
- 2) Evaluate all 16 variables one by one through concepts of sample statistics and build your understanding and observe interesting findings
- 3) Do slicing and dicing of the data which you may call Data Manipulation and do deeper analysis and observe interesting hidden insights
- 4) Post above, prepare power point presentation with 10 slides maximum for giving presentation to **JF**
- 5) Before giving presentation to **JF** you are required to submit following files to your mentor/Team Lead for his approval
  - a. Python Script
  - b. Power Point Presentation
- 6) You need to give 10 mnts presentation in teams during classroom session/s

Best of Luck!

Stay Safe, Stay Focussed & Stay Blessed!
